A Portrait of the Artist as a Young Man

CHAPTER 1 – *The social world of Stephen Daedalus as a young boy*

His strongest relationships are with his parents, but he is also connected to extended family like Dante and Uncle Charles, his school 'fellows', Catholic clergy and his childhood sweetheart, Eileen.

2. Annotation of complete text to clarify

A difference in political opinions had early separated **Sir Everard** from his younger brother **Richard Waverley**, the father of **Edward Waverley**. **Sir Everard** had inherited from his sires the whole train of Tory or High-Church predilections and prejudices which had distinguished the house of [Waverley] since the Great Civil War. **Richard Waverley**, on the contrary, who was ten years younger, beheld himself born to the fortune of a second brother...

Character nationalities

Our research design principles

Nothing is accidental in the world of a novel:

- every character, no matter how minor, should be included, and
- every character mention affects the nature of the social networks

Radical inclusivity

In the process of data gathering, our annotators identify every possible character for inclusion in the social networks - from

historical figures

to

to

living animals

characters
appearing as
groups

This can result in enormous communities - *Pride and Prejudice* has a relatively modest cast, at 117 characters, while *Middlemarch*'s population is 333, and *Vanity Fair* contains over 600 characters.

The importance of low-frequency characters

Grayson, Siobhán et al, 'Discovering Structure in Social Networks of 19th Century Fiction', in *Proceedings of the 8th ACM Conference on Web Science* (presented at the Web Science 2016, Hanover, Germany, 2016), pp. 325-26

Summary: Jane Austen and Charles Dickens make different narrative use of minor or "low-frequency" characters in their respective novels

Two network strategies

Collinear

Mr. Bingley followed his advice. Mr. Darcy walked off; and Elizabeth Bennet remained with no very cordial feelings towards him.
